

think of way of enhancing the right pattern for the benefit of everybody. Ololude,(2006) notes that teacher education is designed to produced highly motivated, sensitive, conscientious and successful classroom teachers who will handle student effectively and professionally or better education advisement. Today's changing and knowledge proliferating society requires teacher's versatility especially with the use of ICT tools

2.1.1 Branches classification of Economics

It is important to see the distinctions between these broad areas of study, according to Pettinger (2019). Economics is a broad subject concerned with the optimal distribution of resources in society. Within the subject, there are several different branches which focused on different aspects. Also, there are different schools of thought which generally have different views on aspect of economics.

The field of economics is typically divided into two main branches: microeconomics and macroeconomics.

microeconomics: It is concerned with individual markets and small aspect of the economy.

Macroeconomics: It is concerned with the whole aggregate economy. Issues such as inflation, economic growth and trade.

To some extent, the split is artificial. Aspect of microelectronics filter into macroeconomics. For example, if you take the study of developing economics, this involves both looking at microelectronics aspect of development (agricultural market) and
